Claim 52 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1. In defining the ring system of formula (I) as 4 possible isomers, applicants have introduced subject matter that is extraneous to formula (I). See the bicyclo system depicted after R2-R4 definitions which includes a point of attachment and additional variable, R1. Compare with claim 51 in parent.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 52 is rejected under 35 U.S.C. 102(b) as being anticipated by Bishop. Bishop describes many compounds within the instant scope for use as intermediates to pharmaceuticals. See examples 1-4, 11 and 13 which all read on the instant scope.

Claim 52 is also rejected under 35 U.S.C. 102(b) as being anticipated by references cited in applicants' IDS filed 10/24/03 such as Mahadevan (ref.BP), or Schneller (ref.CD) or Minakata (ref.CG). In ref.BP see compounds 4, 9a and
